SmartSource[®] Micro Series

Sometimes SMALLER is better...

In a world that's constantly super-sizing this and upgrading that, it's hard to imagine that getting smaller could be a good thing.

But— that's exactly the case with the SmartSource® Micro Series.

We've packaged all the technology you need to affordably and efficiently manage remote deposit capture right from your desktop. No bells, no whistles, no extra costs for features you don't need and won't use!

USB power makes you mobile

Why tie yourself down by choosing a scanner that requires an AC power adapter? The SmartSource Micro series is capable of operating using USB power alone, making you truly mobile without forcing you to sacrifice all the comforts of your office.

Imagine the possibilities... deposit checks from the road and access your money faster. Image receipts and business cards as you receive them, making the possibility of accidental loss miniscule.

You're constantly on the move. Make sure all your best tools move with you.

MICR at Burroughs

At Burroughs we've been working with Magnetic Ink Character Recognition (MICR) technology that we have perfected over many decades. We're exceptional at providing world-class MICR and OCR read rates.

SmartSource Micro technology

We've included the best OCR-driven MICR technology for your E13B and CMC7 read applications. Our SmartSource Micro Series boasts up to a 98% character read rate so you can be sure that you're getting the accuracy that your client demands.

More than just check imaging

Do you need to keep copies of identification on file? Are you tired of entering endless receipts into your accounting system? Have you lost valuable contact information because of misplaced business cards?

If the answer to any of these questions is yes then you need a SmartSource Micro series scanner! Unlike other check scanners on the market, the Micro series can scan a variety of documents (both sides). Choose the Micro for smaller items or select the MicroEX for full page document imaging.

You can also image documents from 0.1mm to 1.0mm thick. That includes most drivers licenses and (un-embossed) insurance cards.

SmartSource[®] Micro Series

(Actual Size!)

Support you can count on

When you purchase a Micro series scanner you don't just get world class support from Burroughs. You also get it from our extensive software partner community. We work with dozens of application providers to make sure that when you want to utilize our scanners the right options are available to you. Check out our website to see which partners can help you create a flawless remote deposit capture program that grows your business.

Power Consumption	0.2 watts standby, 2.0 watts during scan	0.2 watts standby, 2.0 watts during scan
Warranty	12 months	12 months

Private label branding? We can do that.

At Burroughs, we think helping you build your brand can only strengthen ours. If the idea of branding any Micro series scanner with your institution's logo, tagline, or product name sounds exciting to you, give us a call at 1-866-713-3930 to discuss the possibilities!*

* Minimum order quantity, extended lead times for initial availability, and special pricing applies.
